Senator Bob Hall

**GRID DOWN
POWER UP**

The Powerful Documentary

It would end civilization as we know it. ~ Newt Gingrich

Is your family prepared to survive in the 1800s?

When it happens, *it's too late*. There won't be enough money or time in the world to get it working again. ~ **Dr. William Graham, Chairman of Congressional EMP Commission**

There are some 55,000 substations in the Eastern, Western, and Texas Grid. Sabotaging merely 9 selected substations could take down the grid coast to coast. Over one year, with no electric grid, only about 10% of today's U.S. population would survive. *Some 270 million people would die in America.* ~ **Congressional EMP Commission & Former FERC Chair**
